

Release Notes Command Mobile Plus App 4.3.0

March 2023

Introduction

These release notes pertain to the software release version 4.3.0 for the Command Mobile Plus app.

March Networks Command[™] Mobile Plus offers video viewing options combined with Transactions Reports from Searchlight, enabling user insighgts into transactions snynced with video channels.

Command Mobile Plus continues to offers flexible viewing options from your mobile phone or Apple and Android tablets. Crop and stretch any view, and toggle between camera layouts. Zoom in and out on any scene and choose a multi-grid view to see several camera angles at once. Replay desired recorded footage by using the calendar icon on your device, and if you notice something suspicious, take a snapshot of your camera view and send it via email or through other communication applications on your phone. Fast forward and rewind recorded footage and switch between high, low and auto viewing mode based on the video quality you desire.

Command Mobile Plus Features

Command Enterprise Video

- Ability to view live and playback (recorded) video (H.264 and H.265)
- Digital zoom into images to view details (live and playback video)
- View up to 9 live (tablets) and up to 8 (smartphones) cameras simultaneously (stream quality dependent on camera settings)
- Quick and easy recorded video search by time and/or date
- Playback controls with fast rewind and fast forward features (up to 8x on Android and 8x on iOS)
- PTZ camera control (operated by gestures or virtual joystick on iOS or virtual joystick on Android)
- Dewarping for 360° cameras
- Direct connection to a recorder or to a server running the Command Enterprise Software
- Ability to view dewarped images in saved views
- Access to System, Logical, and Personal resources
- Real-time notifications when the configured alarms are triggered
 Note: This feature also requires the Alert Communication Tool Premium (v.1.5 and higher) application

Searchlight

- Ability to view transactions from Transactions Report section of Searchligt
 - o Ability to filter by start / end date / time
 - Ability to pick report set on Command Enterprise / Searchlight client
- Access to the Business Rules page of Searchlight
 - Ability to filter by start / end date / time
- Access to the Operations Audit page of Searchlight
 - o Ability to filter by start / end date / time
 - Access to the Security Audit page of Searchlight
 - o Ability to filter by start / end date / time
- KPI badges displayed on the home page, with the ability to access access the report or the query related to the badge

What's New?

- Searchlight for Banking Transactions Command Mobile Plus is now able to access transaction, alarms, and images processed by the Searchlight for Banking application
- Direct Connection to Recorders It is now possible to directly connect to a compatible recorder to view video streams from its cameras
- **Privacy Patches** Privacy patches are now correctly displayed as configured on the recorder/server instead of obscuring the whole image
- Show Video Info Button A new button, Show Video Info, has been added to the options menu, allowing you to display information about the compression codec, frame rate and bit rate of the camera you are displaying
- User Experience Improvements A number of minor changes have been implemented to improve the user experience while using Command Mobile Plus on both versions

Compatibility and Version Information

Supported Mobile Devices

- iPhone (iOS 15 and higher)
- iPad (iOS 15 and higher)
- Android (10 and higher)

Note: A minimum of 1 GB RAM is required on the mobile device to run the Command Mobile Plus app.

Supported Enterprise Management Services

Command Enterprise Software — software version 2.10.0 and higher
 Note: To access the Searchlight and real-time notifications features, you must upgrade your
 Command Enterprise system to version 2.14.0 and higher.

Supported Applications

- Searchlight for Retail software version 4.14.0 and higher
- Searchlight for Banking software version 4.14.0 and higher
- Alert Communication Tool Premium software version 1.5 and higher

Supported Recorders

- Command Recording Server software version 2.10.0 and higher
- 8000 Series Hybrid NVR software version 5.8.5 and higher
- 8724 V Tribrid NVR software version 5.10.0 and higher
- 9000 Series IP recorder software version 5.9.0 and higher
- RideSafe GT Series Hybrid NVR software version 5.8.5 and higher
- RideSafe MT Series IP recorder software version 5.11.0 and higher
- RideSafe RT Series IP recorder software version 5.11.0 and higher
- RideSafe XT Series IP NVR software version 6.4.0 and higher
- X-Series Hybrid Recorder software version 6.4.0 and higher

Supported Encoding Profiles

- VA2 Series SE2 Series SE2 PTZ ME3 PTZ EL2 Series
 Primary encoder (for single streaming): 2MP / 15 FPS / LBR / GOV 30 / Bitrate: ~1.5Mbps
 Secondary encoder (for multi-view): 720P / 10 FPS / LBR / GOV 60 / Bitrate: ~750Kbp
- VA4 Series SE4 Series ME6 Series ME8 Series
 Primary encoder (for single streaming): 4MP / 15 FPS / LBR / GOV 30 / Bitrate: ~2.5 Mbps
 Secondary encoder (for multi-view): 720P / 10 FPS / LBR / GOV 60 / Bitrate: ~750Kbps

Supported Languages

• Command Mobile Plus is available in English. Additional languages will be supported with future releases.

Command Mobile Plus – Command Mobile App Comparison

Feature	Command Mobile App	Command Mobile Plus
Compatible recorders	 8000 Series 9000 Series RideSafe Series X-Series 	 8000 Series 9000 Series RideSafe Series X-Series
