Operations Audit as a Service

A new video auditing service, delivered via email, for March Networks hosted customers

Gain automatic insight into every area of your business — everyday — for less than \$1 a day.

With March Networks' new Operations Audit as a Service, our team will set up and configure automatic email video audits of your business, allowing you to visually oversee your entire operation. You receive daily email reports showing video snapshots from your preferred cameras and store locations, at the most critical times of the day. Reduce loss and improve operations and performance by visually monitoring all areas of your business at different times throughout the day.

The Operations Audit as a Service is available for purchase on a 1-year term with a per NVR fee. Speak to your March Networks representative to get started today!

marchnetworks.com

Easily discern:

- How clean each store is
- If employees are properly dressed
- If shelves are properly stocked
- How many customers are in a store at one time
- If menus, marketing materials or promotions are correctly displayed
- Opening and closing time activities
- If any suspicious activity (like loitering) is taking place

Retail and restaurants can also monitor:

- Health and safety considerations like food preparation
- Customer service and employee performance during busy meal periods
- Activity at the point-of-sale (POS) or drive-thru during critical times of the day

The Operations Audit as a Service includes:

- An automatic daily email report, with up to 48 images from up to 8 different cameras
- You choose the store locations and cameras, as well as dates and times we capture images
- Each camera may have up to 3 non-sequential times per business day selected (for example, 12pm lunch; 6pm dinner and 10pm close)
- Each camera and selected time will show 2 consecutive images (8 cameras X 3 times per day X 2 consecutive images from each camera = 48 images per day)

NOTE: Customers must be using March Networks hosted Searchlight or Command Enterprise Software (CES) Cloud service to take advantage of Operations Audit as a Service.

See what's going on — without going in!
