

Activate skills and experience with Accelerator

Accelerator is the heartbeat of the March Networks Learning Management System (LMS), where installers and technicians can take pride in accomplishments while building intelligence and expertise on March Networks products and solutions. Points and special badges are earned for every successful certification as well as for reaching certain milestones with installations of our products.

ACTIVITY	POINTS AWARDED
Passing an Exam	Exam score out of 100 into points (75 and above)
Scanning an NVR	50
Completing a Challenge	30
Watching a Video	5
Watching a Presentation/Tutorial	5
Reading a Training Document	3

Earn badges on Accelerator and show them proudly

As installers and technicians complete certifications, watch training videos or read documents, the LMS records the effort and awards the appropriate badge upon completion of a series of activities. Another way to earn badges is to scan the QR code on our 8000 Series Hybrid NVRs upon installation with our GURU Smartphone app. With every NVR installed, points are earned and appropriate badges are awarded as experience increases. Badges and points are displayed on the Learning Management System on the individual's profile page, and can be shared via social media if desired.

Now it's easy to demonstrate skill and expertise with March Networks solutions. Enjoy some competitive spirit with colleagues and installers worldwide by keeping an eye on the Leaderboard to see rankings globally and within the company.
