

DMP Control Panel / March Networks 8000 Series NVR Integration

*Advanced integration
for superior video
and alarm panel
management.*

The integration of the **March Networks® 8000 Series NVR** and the **DMP Control Panel** offers a superior solution for integrating and managing IP-based digital video, and alarms from control panels. The integration allows both alarms and events from DMP's **XR550** and **XR500** Panels to be seen and recorded by an 8000 Series NVR. The NVR can then initiate a variety of actions in response to those alarms. The result is a tightly integrated alarm panel and video management system that enables faster incident response times and better risk mitigation, as well as a stronger overall security solution.

With this integration, any DMP control panel event can initiate a wide range of actions via the March Networks NVR. For example, the control panel will monitor specific access points, typically at a key card or badge entry system. The panel can also monitor for specific alarms, such as burglar, fire, panic, etc., which could be associated with a particular area. When one of these access points or alarms are triggered, the NVR initiates a pre-defined action, such as displaying live video pop-up's, moving PTZ cameras to preset locations, or sending notification emails (when used in conjunction with ESM). All alarms and events appear within the system alarm logs and can be searched and viewed when playing back recorded video.

*Additional information about the
March Networks 8000 Series NVRs
is available on the March Networks
web site:

FEATURES

- The 8000 Series NVRs can monitor any alarm that occurs on a DMP panel, including burglar, fire, emergency, and panic alarms.
- The NVR can monitor for alarms and events by zone or area.
- All alarms and events are logged, recorded, and are searchable on the NVR.
- The NVR can initiate an action/output in response to an alarm (e.g., a panic button) or an event (e.g., a card swipe).

COMPATIBLE MODELS

- March Networks 8000 Series NVRs (running Visual Intelligence 5.7.9 or higher)
- DMP XR500 Series Access/Burglary/Fire Panel
- DMP XR550 Series Access/Burglary/Fire Panel
