

# CES C•CURE 9000 Plug-In for March Networks NVRs and CRS

Plug-in module for integrating  
and managing video and  
access control

For customers who want to correlate video and access control information in a single interface, this plug-in allows for seamless integration between Software House's **C•CURE 9000** system and March Networks® Command VMS and 8000 Series Hybrid NVRs. This single integration through the Command Enterprise Server also allows customers to access live and archived video (from both the NVRs and CRS) through the C•CURE 9000 user interface.

## SUPPORTED SOFTWARE HOUSE SYSTEMS

C•Cure 9000 version 2.30, 2.40, 2.50

Software House API connectivity license is also typically required

## SUPPORTED MARCH NETWORKS SYSTEMS

March Networks Command Enterprise Server (CES) version 2.0+

March Networks Command Recording Server (CRS) version 2.0+

March Networks 8000 Hybrid Series NVR running software version 5.8.0+

**Note:** March Networks Command Recording Servers and NVRs must be managed by a Command Enterprise Server.

## SUPPORTED OPERATING SYSTEMS

Windows® 7 Professional SP1 or later

Windows® 7 Enterprise SP1 or later

Windows® 8.1 Professional SP1 or later

Windows® 8.1 Enterprise SP1 or later

Windows® Server 2008 R2 Standard SP1 or later

Windows® Server 2008 R2 Enterprise SP1 or later

Windows® Server 2012 R2 Standard

## ORDERING INFORMATION

34518	C•CURE 9000 Plug-in license for CES – single software license for plug-in integration module
-------	--

## Key Benefits

- ▼ **Monitor employee traffic in and out.** Compare live video to stored badge images to confirm identity of people entering and exiting facilities.
- ▼ **Initiate actions in the C•CURE 9000 system.** Events can trigger actions like automatic recording of video, displaying live pop-up's of alarm video, calling presets, and sending email notifications.
- ▼ **Comprehensive alarm search.** All C•CURE 9000 alarms and events appear within the system alarm logs and can be searched, viewed and exported via Command.
- ▼ **Advanced bi-directional integration.** Control PTZs, activate/de-activate alarms, listen or speak with two-way audio support.
- ▼ **Verify status of system components.** The C•CURE 9000 user interface provides information about the health of March Networks recorders and cameras, and sends alerts in the event of camera connection loss.

*Integrate your video and access control  
systems for faster incident response  
times, better risk mitigation, and a  
stronger overall security solution*
