

SE4 Covert Camera

Discreet 4MP camera with High Dynamic Range (HDR) and optional height strip housing

NDA compliant
ONVIF | S

For customers looking for reliable, discreet surveillance, the **SE4 Covert Camera** from March Networks® delivers crystal-clear 4MP images at close range, even in bright light or near-dark conditions. The optional height strip housing allows the camera to be installed near a building's exit, so it is positioned directly at a person's face for more reliable identification, even when the person is wearing a hood or a hat.

Key Benefits

- ▼ **Low-Profile surveillance.** The camera's modular design allows the encoder unit to be concealed inside a wall or ceiling, so only the inconspicuous lens is visible.
- ▼ **Height strip housing.** Mount the camera inside this housing to capture a detailed facial view, at eye level, as the person exits. Housing sold separately.
- ▼ **Digital Overlap High Dynamic Range (DOL-HDR).** The camera blends the best parts of three separate exposures together to combine the most focused, well-lit, and colorful parts of the scene.
- ▼ **QR Code.** Use the March Networks GURU smartphone app to scan the camera's QR code for instant product information, like serial number, warranty information, etc.
- ▼ **Save money on storage and bandwidth.** The camera's low bit rate (LBR) setting reduces storage and bandwidth usage by 50% or more in most applications; streams can drop below 1Mbps at 2MP (15 fps).
- ▼ **Compatible with Parabit mounting options.** The camera can be installed in Parabit's counter mount, drive-up, and doorway mounts.
