

March Networks Keyboard V3

The **March Networks® Keyboard V3** is a robust and ergonomic video surveillance keyboard that provides efficient navigation and accurate control over resources added to a March Networks Command™ system. The keyboard is fully supported by both SiteManager and DecodeStation VX applications and allows operators to move quickly between cameras, maps, sequences, and views. Its integrated 3-axis joystick enables the precise control of all cameras, while its jog dial and shuttle ring help operators instantly review relevant video evidence.

Easy to install, easy to use

The March Network Keyboard V3 is a USB-powered peripheral that can be connected to any computer running March Networks SiteManager or DecodeStation VX. The unit is design for both left and right-handed use, and installs in just a few minutes.

Precise ptz control

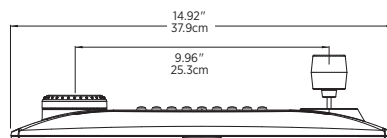

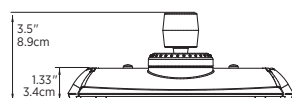

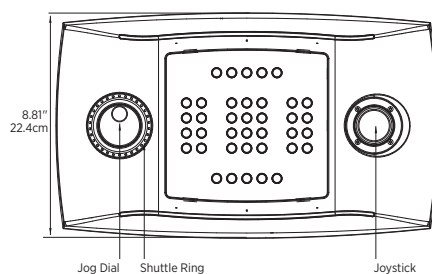

The keyboard's integrated 3-axis joystick enables you to intuitively control any supported pan-tilt-zoom (PTZ) camera added to the Command system. It also supports advanced PTZ features such as zoom, focus, iris, PTZ presets and PTZ tours.

Powerful video review

Reviewing relevant video evidence using the Keyboard is a quick and easy task. Operators can instantly recall the latest recorded video, and use the jog dial and shuttle ring for efficient video playback, from fast rewind/forward, to frame-by-frame viewing.

Key Benefits

- ▼ Support for SiteManager and DecodeStation VX
- ▼ Easy single or multi-camera display and map selection
- ▼ Easy pan-tilt-zoom (PTZ) control
- ▼ PTZ camera presets and tour support
- ▼ Easy frame-by-frame playback control
- ▼ Alarm acknowledgement
- ▼ Auxiliary alarm output change of state
- ▼ Power via USB port
- ▼ Ergonomic design, left or right-handed use
