Resolved Issues

The following issues have been resolved in this release.

Issue ID	Description	Affects
34977	When using "showdisk" the output is now properly formatted and shows all disk information properly.	NVR
35504	Registering a recorder which has a time that is significantly different than the CES time (i.e. > 30 seconds) no longer causes the registration to fail.	NVR
35892	If a recorder disconnects from the CES during a time synchronization sequence, it no longer impacts the ability of the recorder to capture video.	NVR
35988 35991 35993	On recorders that take longer periods of time to perform a systematic shutdown, the recorder now completes the shutdown process properly and no longer experiences a hard power off.	NVR
36042	Seproban functionality now works properly with the 4 and 8 channel recorders.	NVR

Known Issues and Limitations

See the release notes for version 5.11.0.0094 for known issues and limitations.
