March Networks Tailored Solutions for Restaurants

Enhanced Security, Loss Prevention, Business Intelligence

Leading the Future of Intelligent Video Solutions

MARCH® networks
A Delta Group Company

Your Partner for Restaurant Growth

Increase transaction averages, speed of service and guest frequency; reduce food and labor costs and protect against liability claims.

In the fast-paced restaurant industry, success is more than just serving great food. It's about creating a secure, efficient, and enjoyable environment for your customers and staff; and maximizing opportunities for increased profits. Whether you have two locations or 200,000, March Networks' portfolio of tailored and scalable solutions will transform your restaurant operations, leveraging enhanced security, loss prevention, and cutting-edge business intelligence while more effectively managing sales, food and labor costs.

Solutions for Real-World Problems

Theft, Fraud, and Inventory Management

Integrate video surveillance with your POS systems to visually verify transactions and stock levels, identify fraudulent transactions in real-time, and receive alarms for suspicious activities.

Compliance and Safety

Automate compliance and enhance safety with video verification of incidents and health protocols. Our system alerts you to potential hazards, like blocked exits, helping you avoid fines and reduce liability.

Operational Efficiency and Marketing Insights

Gain unparalleled insights into your operations and marketing effectiveness, like dashboards and reporting to optimize menu mix, cost efficiency and sales. Effortlessly monitor and audit your operations remotely with features like email snapshots, automated reports, and real-time video monitoring.
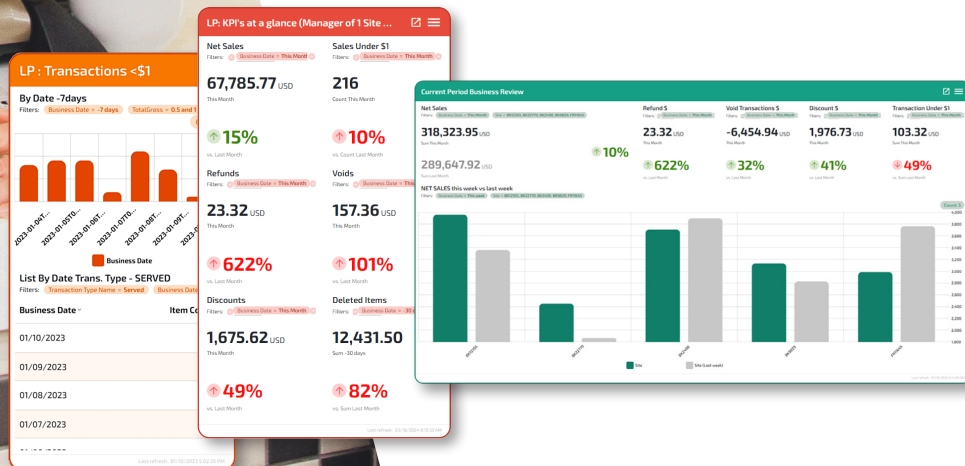

Enhancing Customer Experience

Utilize analytics to refine dining layouts, reduce wait times, and improve service quality. Our system provides actionable intelligence on service time and customer behavior, helping you create memorable dining experiences.

### Multi-Site Management and Cybersecurity

Manage and secure thousands of devices across all locations with ease. Our solutions offer flexibility, scalability, and the highest level of cybersecurity, ensuring your data and operations are protected.

Searchlight Cloud for Restaurants: Intelligence at Your Fingertips

Our Business Intelligence platform, Searchlight Cloud, integrates video surveillance with transaction data and AI analytics, delivering alarms and actionable insights directly to you. This cloud-based solution simplifies the management of your restaurant operations, and reduces burdens on your IT team, offering:

- **Real-Time Notifications:** Keep a pulse on your operations with real-time alerts and comprehensive reports. Identify trends, monitor transactions, and receive instant notifications on suspicious activities.

- **Data into Dashboards:** From POS systems to smart safes and IP cameras, Searchlight Cloud aggregates data from various sources into a unified dashboard, allowing you to track and report on incidents and performance across all locations.
A Recipe for Success

March Networks is committed to your success. Our solutions are designed to address your unique challenges head-on, providing you with the tools you need to succeed.

Our end-to-end services include setup, configuration, and maintenance of your entire system, allowing you to focus on what you do best — running your restaurant. Benefit from cadence reviews, system adoption monitoring, and expert services to optimize your operations and drive growth.

With March Networks, you gain a partner with global reach and local support, dedicated to enhancing your security, profitability, and customer experience.
