

The March Networks/Dunkin' Partnership

ABOUT MARCH NETWORKS

March Networks is the largest official Inspire Brands supplier of video surveillance solutions for the Dunkin' system. Since 2011, we've partnered with over 5,600 Dunkin' locations across 40+ U.S. states, seamlessly integrating our intelligent video surveillance and loss prevention solutions with Dunkin's POS systems to help drive profitability and operational success.

The Impact We Deliver

Transform your Dunkin' franchise with AI-powered video surveillance that does more than protect—it drives performance. Backed by March Networks' dedicated support team, our smart solution helps you audit openings and closings, optimize labor, monitor unattended cash, and even ensure the right products are in the right donut cases at peak times. With high-definition video, advanced analytics, and mobile access, you can oversee operations, fine-tune your drive-thru, and make faster, data-driven decisions—anytime, anywhere.

Run a Smarter Dunkin' with AI Smart Search

AI Smart Search makes it easy to find the video you need. Just speak or type a request—like “Show me open back doors at night” or “Find long drive-thru lines”—and get the right images in seconds, just like using a search engine. Stop theft, improve service, and run your stores more efficiently, fast, and easily.

Did You Know?

Your surveillance system can do more than just monitor your business—it can boost profits and enhance operations in three key ways:

Transaction Reviews

Investigate theft and assess behavior by reviewing video-linked transactions. Identify trends and detect fraud with custom reports and automatic alerts.

Operations Audits

Quickly review camera snapshots to instantly spot issues like cleanliness, employee behavior, and safety, and ensure your store opens and closes on time.

Business Analytics

Discover customer trends, optimize your drive-thru vehicle dwell times and service speeds, track employee KPIs, and gain insights into overall store performance.
